

# Present your idea

Use this checklist to create a great presentation!

Level 3

Explain how your plan fits into the site's usage patterns.

Include lots of detail about how you store, soak, move or contain water.

Suggest what materials you'll use in your plans.

Explain how your ideas improve the site.

Show us your design in a clear labelled drawing.

Help us understand how it manages water after heavy rain.

Explain how it's better for water, for people and for nature.

Level 2

Level 1

## Other ideas to bring your ideas to life:

Include photos of your site or a video tour.

Film a video to present your idea. Plan what you'll say. Make sure the visuals and audio are clear.

Create a 3D scale model of your ideas.

Present your ideas and get feedback on how to improve your explanations.
