Hi [REDACTED]

I have just seen the attached response. I would be appreciative if you could provide me the details of the engineer reviewing the application so we are able to solve the issues directly. In the meantime, could you please pass the below information on to them.

The 12.4l/s from the DCG is not a pumped rate (although it does allow for the pump rate within it), it is the approved peak rate of discharge from 248 units, based 0.05l/s per unit. Under the S106 (Water not Planning Act), this is the allowable discharge rate, and it is for Anglian to ensure downstream is sized to allow for these flows.

Kind regards

[REDACTED]

Good afternoon,

Following up on the below email. I have also just left a message on the phone number on the comments.

If this could please be reviewed as soon as possible as the application is overdue for a decision and the necessary information was provided in the first instance. It is now withholding the development from commencement. Any questions please get in touch.

Kind regards

Good morning,

I'm writing in regards to a discharge of condition application (your ref PLN-0137202) that Anglian Water were consulted on in November 2021 and advised all the information detailing the foul water drainage scheme of the entire site was within the attached document. There has since been no comment.

This application is now urgent and the comments from Anglian Water are prohibiting the condition being discharged. Could this please be reviewed as a matter of urgency?

Kind regards
