Dear requester

### Provision of requested information

Thank you for your request for information about availability of EDM monitors at Raunds STW, which we received on 03 June 2025. Your request has been considered under the Environmental Information Regulations 2004.

The % operational is governed by several factors. The Raunds monitors are hardwire probes, which are rarely affected by the issues we see with radio or 3G or 4G telemetry (these devices rely on good telemetry connection and can fluctuate due to external factors like signals getting blocked)

Anglian Water changed our methodology for uptime calculations that affected last years data. This is calculated by assessing how much of the data we received was deemed good quality through our Quality Assurance process. This aligns us close with the UKWIR Sewer Analytics guidance and the good practice guide for calculating our monitor figure. We also remove monitor maintenance from the calculations, so if or when the monitor is taken out of service for cleaning or maintenance reasons, we also adjust the figure. This will also include instances where we need to adjust the monitors to remove noise or erroneous data.

The available drop downs in the annual return does not allow us to put specific reasons for low % operational.

The information supplied to you continues to be protected by the Copyright, Designs and Patents Act 1988. You are free to use it for your own purposes, including any non-commercial research you are doing, and for the purposes of news reporting. Any other re-use (for example, commercial publication) would require the permission of the copyright holder. It is important that this data is not published for security reasons.
