Dear requester

**Provision of requested information and Information is reasonably accessible**

Thank you for your request for information about the frequency of discharge from Huntingdon Water Recycling Centre (Cow Lane sewage works, Godmanchester) and the outflow into the River Ouse upstream of Houghton and Wyton, which we received on 9 June 2025. Your request has been considered under the Environmental Information Regulations 2004.

Please find attached HUNTST TDV Data.xlsx which shows the Final Effluent discharge from Huntingdon Water Recycling Centre.

Start stop times for 2021 to 2024 can be found on our website [Storm overflows](#) and the most recent monthly data for 2025 can also be found on our website [Monthly EDM Publication](#). The monthly data is a summary of all EDM activations as shown on the storm overflow map. It is not quality assured to a regulatory return standard, so it has a lower data quality and should be considered indicative of an activation, rather than confirmation of a spill.

Information on the results of testing on the discharges can be found on the Environment Agency Website [Open WIMS data](#)
