Dear Requester

Thank you for your request for information about Tritium and Radon monitoring, which we received on 6 October 2025. Your request has been considered under the Environmental Information Regulations 2004 (EIR).

You requested:

1. Tritium and Radon Monitoring at the Ipswich area aquifer

EIR Response: Provision of Requested Information

Please find attached:

- Radioactivity Waver Query_1901_AC Ipswinch CC.docx

Item 1 is held by Anglian Water and has been provided as an attachment.

Our groundwater team has identified each of the sources listed below from the aquifer of interest (using postcode IP3 9TT). The sources feed to WTWs for which we have a Notice under Regulation 6(12) for Radioactivity Monitoring.

- Belstead
- Bramford
- Playford
- Tuddenham St Martin
- Westerfield
- Whitton

The Notice applies to the points of supply at the WTW and the associated PWSZs.

Data from the respective WTW final water monitoring points has confirmed that the risk presented by the regulatory radioactivity parameters at these sites is low. Please see attached extracts from the current Notice (ANH_2021_00006 v2) with details of the WTWs of interest.
