Dear Requester

Thank you for your request for information about PFAS, which we received on 10 November 2025. Your request has been considered under the Environmental Information Regulations 2004 (EIR).

You requested:

1. Raw and treated water quality data for PFAS compounds

EIR Response: Provision of Requested Information

Please find attached:

- 3509 AW PFAS Data from 2022.xlsx

Item 1 is held by Anglian Water and has been provided as an attachment.

As requested, we have supplied an Excel file containing all raw water and treated water (potable) samples which have PFAS results, from 1 Jan 2022 to 04 December 2025.

The spreadsheet contains the type of water sample, an identification number, the grid reference, Northing and Easting for each sample point. As directed by our drinking water regulator, the Drinking Water Inspectorate, from 1 Jan 2025 we analysed for 48 PFAS species. Previous to this date, we were testing for 47 PFAS species from 2022. The name of each PFAS is in the spreadsheet along with the result in nanograms per litre. The LOD for the analysis is listed against the results.

All of our treated water is compliant with the 0.1 microgram per litre PFAS wholesomeness value.
